

Dr. Tim Spahr
IAWN Manager

Ioannina Greece, October 12th, 2021

Dear IAWN Steering Committee,

I am the owner of the NOAK observatory, an amateur observatory located in Ioannina, Greece. I started astrometric observations since 2017. My main goal is to observe objects that are placed on the NEO confirmation page. I participate also in several projects including asteroids (photometry and occultations), comets, exoplanets (ESA Ariel mission) and I collaborate with universities.

My observatory is equipped with 0.25m a Newtonian OTA at f/4.7 on a robotic mount and high QE CCD and CMOS cameras, reaching magnitudes at 20 mag.

I would like to join the International Asteroid Warning Network. I have read the IAWN Charter and understood the obligations of IAWN members.

Sincerely,

Nick Sioulas
